Book 1 · Lesson 0 extra · sheet 1 of 2
myfirstthai.com/b1/0

The dark shape is the model. Trace the light ones. Start at the ● and follow the arrow. Go slowly: neat first, fast later.

1 · The 6 strokes

Every Thai letter is made from these (book page 10).

Head, turning in
a tiny circle; the line leaves it on the inside

Head, turning out
a tiny circle; the line leaves it on the outside

Notched head
a small zigzag at the top

Straight line down
top to bottom, one move

Curve
a smooth round line, no corners

Tail
a small line that turns up at the end

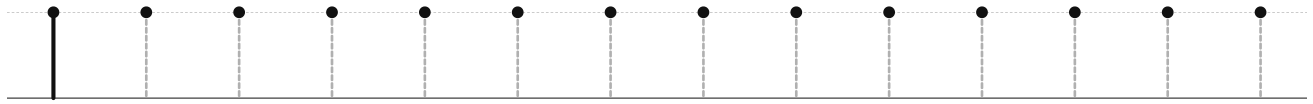

2 · Small round heads

Start at the top and go round in one move. Keep each head small, between the black line and the grey dashed line.

3 · Straight lines down

Start at the top ●. All the same height.

4 · Where do upper and lower vowels go?

Trace the dot above or below each grey อ.

Start at the head
Most letters have a small circle. Start there, then draw the rest in one smooth line.

Keep heads small
A big head looks like a different letter. Small and round.

Same height
Most letters sit on the black line and stop at the grey dashed line. A few, like ป, go higher.

Your first 4 letters: ก ด ต ป (all mid class)

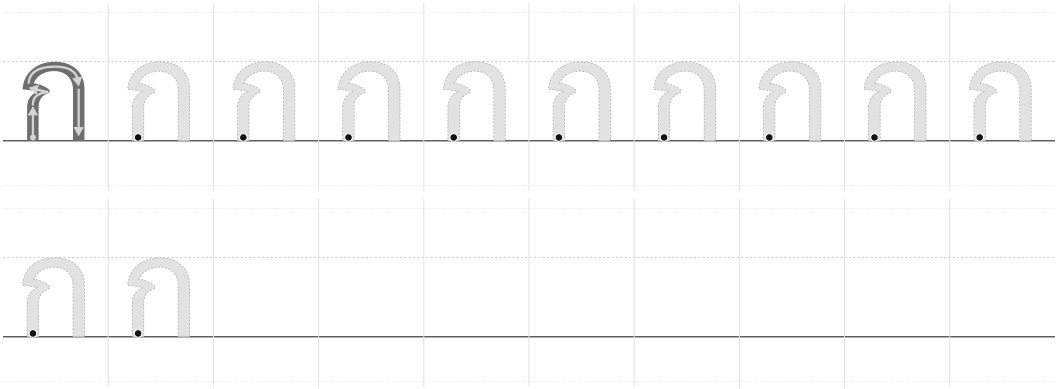

Learn Thai with Teacher Bua
Book 1 · Lesson 0 extra · sheet 2 of 2
myfirstthai.com/b1/0

Row 1: look at the dark model and its arrows, then trace the light letters. Row 2: trace 2 more, then write on your own to the end of the line. Start at the ●.

ก

กอ ไก่

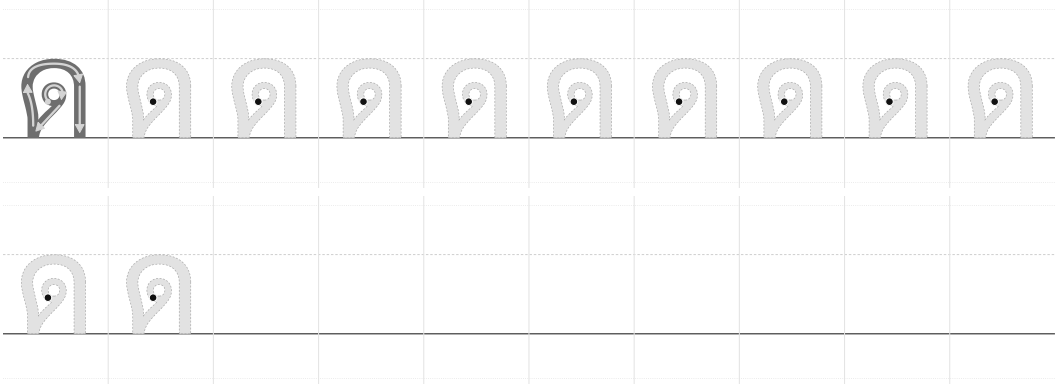

g · chicken

ด

ดอ เด็ก

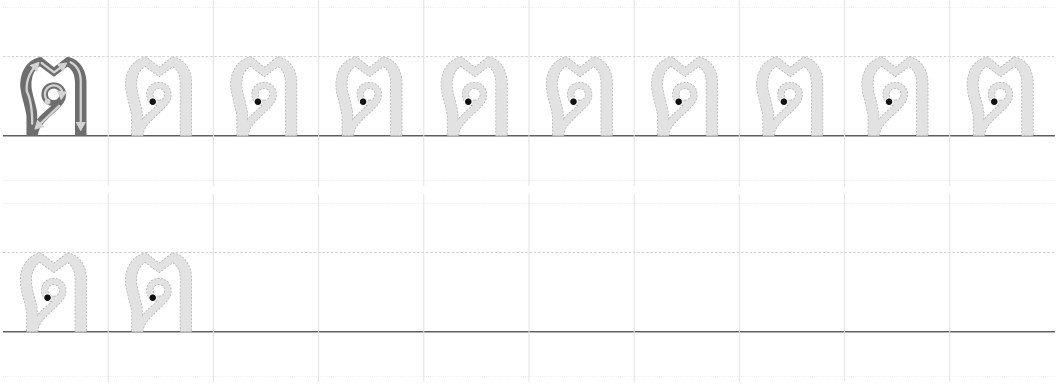

d · child

ต

ตอ เต่า

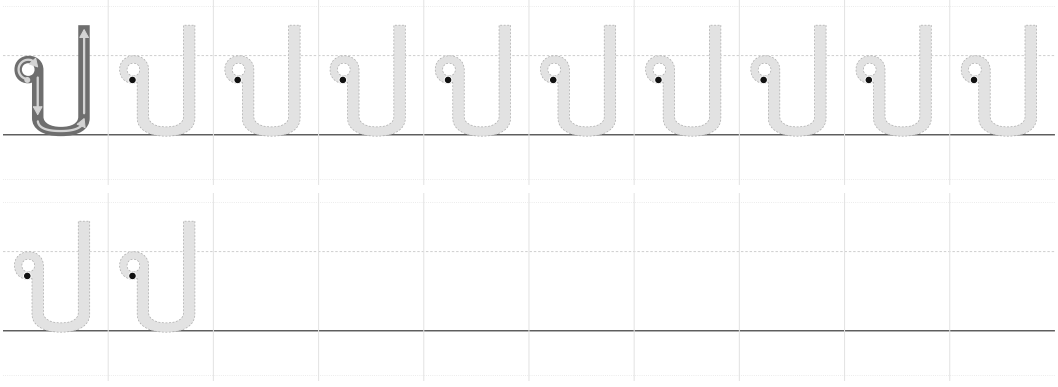

dt · turtle

ป

ปอ ปลา

bp · fish

ก has no head
It starts at the bottom left ● and goes up. Don't draw a circle.

ด and ต
The head turns in. The only difference: ต has a small notch at the top.

ป has a tall line
The right line goes up past the dashed line. You meet all 4 in Lesson 1.
